DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-8, drawn to a method of manufacturing an electronic charge transferring device, classified in class 29, subclass 592.1.

II. Claims 8-20, drawn to a method and apparatus for transferring an electric charge, classified in class 361, subclass 225.

2. The inventions are distinct, each from the other because of the following reasons: inventions I and II are unrelated due to their different modes of operation, particularly since invention II is drawn to a Van de Graaf device assembly, while invention I is drawn to the method of manufacturing an electronic charge transferring device, which is a component of the above mentioned assembly.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Telephone call were made to attorneys of record on May 19, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made [see also interview summary].

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed.

6. Any inquiry concerning this communication or earlier communications form the examiner should be directed to Examiner Pia Tibbits whose telephone number is 703/308-7305. The fax number is 703/308-5841. Any inquiry of a general nature or relating to the status of this application should be directed to the group receptionist whose telephone number is 703/305-4900.
